GPA 3.75

Where engineering meets imagination

UI/UX & FRONTEND DEVELOPER · CREATIVE WRITER · AI LEARNER

PROFILE

Engineering student by day, UI/UX designer by practice, and storyteller at heart.

I design functional, aesthetically sharp interfaces grounded in solid engineering principles. My background allows me to bridge the gap between design vision and technical execution.

Beyond the screen, I spend my time writing fiction, listening to music, and working on creative side projects.

EXPERIENCE

Freelance Web Developer & UI/UX Designer

- Delivered client websites end-to-end — from UI/UX design through frontend implementation — for local businesses.

Communication and problem solving

- Listened to the need and implemented through the solutions.

SELECTED PROJECTS

Blade Razor — Salon Website

Client Project · Design & Development

- A modern, responsive business website designed and developed for Blade Razor using React, Tailwind CSS, Three.js and TypeScript; handled the UI/UX direction and Frontend implementation, creating a professional digital presence with a clean visual identity, intuitive navigation, and an engaging user experience across desktop and mobile devices.

Dental Clinic Demo — Website

Design & Development

- Designed and built a professional website for Dental Clinics using Vite, React, HTML, TypeScript and Three.js with an immersive, responsive healthcare aesthetic, intuitive navigation, interactive elements, and a streamlined appointment experience.

The Last Empiricists

Novel · Science Fiction

- "A story of two castes, a stolen mind, and a boy who walked toward the thing everyone else walked away from."

CORE STRENGTHS

Visual Design

Frontend Execution

Responsive UI/UX
